New Hampshire Landscape

Landscapes transport us to so many unique places by just viewing them in a museum or even from home. Create a unique landscape of your choosing, imagined or real!

Activity: Torn Paper Landscape Collage

Materials:
- Paper (Construction Paper, Printer Paper, Magazines, Newspaper, etc.)
- Glue stick or Tape

Directions:
- Decide what type of landscape you want to make and pick out the colors you need before starting
- Choose a whole piece of paper for your background
- Start tearing and layering your paper to create your middle ground and foreground
- Glue down your pieces as you go
- Tear smaller pieces to add detail
- When you think you’re done, ask, what else could I add? A tree, an animal, a person?

Tips:
- Plan out what you are going to make before you start, just a rough idea is helpful
- Layout pieces before you glue them to see what it will look like
- Use small pieces of paper to make a bigger object, like a cloud
- Hold the paper down on a table while you tear to have more precise lines
- Have fun! Create a place that doesn’t even exist, maybe only in your imagination
